

28 April 2023

Dear Members,

ANNUAL FEE CHANGES FOR THE 2023/2024 FINANCIAL YEAR.

The above subject matter has reference.

The Engineering Council of South Africa (ECOSA) announced the changes to the annual fees for the 2023/2024 financial year which were published on 05 April 2023. ECOSA has undertaken research with the members to understand some of their concerns and the issue of high increases to registration fees was raised given the current economic environment. We are understanding of the current environment and our research has enabled us to take into consideration concerns from our members on the issue of registration fees and as such we pleased to notify you of the following changes in our annual fees to the 2023/2024 financial year:

- a. A nominal increase of 5% to the registration fees less than the current market CPI of 7%.
- b. An increase in the early bird discount for candidates and professionals has been effected and the early bird discount is R250 for Professionals from R100 and R150 for Candidates from R50 previously.

We are committed to improving the services and value we provide for our members.

As always, we appreciate your feedback, so please let us know if you have any questions or need any further clarity @ engineers@ecsa.co.za.

Yours Sincerely,

.....
Dr B Ssamula
Chief Executive Officer (CEO)
